Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 27 September 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 3-4 and 6-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yutaka (JP 08-050290) in view of Benzing et al (US Patent 6,547,910).

Yutaka discloses a method and apparatus for adhering a polarizing plate. As shown in the figures, a substrate 12 is positioned on holding mechanism 10. This holding mechanism moves the substrate past adhering mechanism 30 and pressing roller 22. Adhering mechanism 30 includes stripper bar 36, which separates release film 41 from polarizing plate 40. After being separated, polarizing plate 40 is pressed against and adhered to substrate 12 by pressing roller 22.

However, Yutaka does not disclose tilting the mounting surface or the holder as claimed by the applicant. Regarding these differences, the applicant is directed to the reference of Benzing et al.

Benzing discloses a method and apparatus for applying a covering to a breakable material. As shown in Fig. 5, support 6 is positioned in mold 8. Layers 1 and 2 are applied to support 6 by roller 19. During this application, roller 19 tilts to accommodate the shape and contours of support 6. See col. 8, lines 43-63.

It would have been obvious to one having ordinary skill in the art to employ a holding and tilting system, as taught by Benzing, in the method and apparatus of Yutaka in order to facilitate application of the polarizing plate. Further, it is the examiner's position that tilting the applicator and tilting the mounting surface are functionally equivalent alternate expedients in the art. Therefore it would have been obvious to one having ordinary skill in the art to tilt the mounting surface instead of the applicator in the method and apparatus of Yutaka based on the physical requirements of the substrate.

Response to Arguments

3. Applicant's arguments with respect to claims 1, 3-4 and 6-8 have been considered but are moot in view of the new ground(s) of rejection.

Telephone/Fax

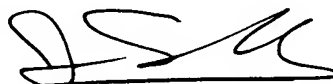

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to James Sells whose telephone number is (571) 272-1237. The examiner can normally be reached on Monday-Friday between 9:30 AM and 6:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chris Fiorilla can be reached at (571) 272-1187. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
